“UN Member States on the Record”

<http://www.un.org/memberstatesontherecord>

The Dag Hammarskjöld Library launched on 13 November 2009 “UN Member States on the Record”, a new research tool which will dramatically facilitate research on the work and actions of each Member State, and make information more accessible and easy to find. Based on frequently asked questions, the Library developed this tool to highlight the work and actions of each individual Member State and to consolidate information scattered in multiple databases to one user-friendly resource. This opens the rich primary research resource of United Nations documents to anyone who can browse the web -- delegates, Model UN participants, or interested citizens from around the world. Information available for each Member State includes the key documents related to its membership in the United Nations, statements made before the principal organs, draft resolutions sponsored, periodic reports submitted on human rights conventions, and more. Running behind this new research tool are preset searches on multiple databases maintained by the Dag Hammarskjöld Library. A single click links people to the most accurate, up-to-date results, and yet also includes extensive historic coverage. Full text documents are linked in all official languages of the United Nations. (Press Release PI/1918, 12 November 2009)

As world leaders enter into final negotiations ahead of the Copenhagen climate talks, almost a quarter of the global population —1.5 billion people— lives without electricity, 80 percent of them in the least developed countries (LDCs) of South Asia and sub-Saharan Africa. That's according to figures from a new UN report that shines a light on the plight of the three billion people without access to modern energy services. The report was produced in partnership by the United Nations Development Programme (UNDP) and the World Health Organization (WHO), with support from the International Energy Agency (IEA).

http://www.unece.org/env/documents/2009/Wat/mp_wat/ECE_MP.WAT_30_E.pdf

- Water resources are extremely vulnerable to the climate change.
- Many countries in UNECE region has been negatively affected by "severe impacts from extreme events and disasters".
- Transboundary nature of water resources in the region presents shared risks and challenges thus solutions in adaptation need to be coordinated between all states in a transboundary basin.

The Guidance provides step-by-step advice for development of adaptation strategies, which would support implementation by countries of the Water Convention and its Protocol on Water and Health in the context of climate change.

Spanish press kit: <http://www.unhabitat.org/documents/GRHS09/K0952834s.pdf>

Planning Sustainable Cities reviews recent urban planning practices and approaches, discusses constraints and conflicts therein, and identifies innovative approaches that are more responsive to current challenges of urbanization. It notes that traditional approaches to urban planning (particularly in developing countries) have largely failed to promote equitable, efficient and sustainable human settlements and to address twenty-first century challenges, including rapid urbanization, shrinking cities and ageing, climate change and related disasters, urban sprawl and unplanned peri-urbanization, as well as urbanization of poverty and informality. It concludes that new approaches to planning can only be meaningful, and have a greater chance of succeeding, if they effectively address all of these challenges, are participatory and inclusive, as well as linked to contextual socio-political processes.
