<http://www.unric.org>

A common UNRIC website is operational in 13 languages of the region: Danish, Dutch/Flemish, English, Finnish, French, German, Greek, Icelandic, Italian, Norwegian, Portuguese, Spanish and Swedish. Each language site gives information about the most important current UN-related events, activities and observances, as well as UNRIC and UN family programmes in the region. The sites in non-official UN languages (all except English, French and Spanish that have links to the UN headquarters website) also present basic information on the UN organization, including its structure, goals, main documents, affiliated agencies, employment opportunities and main areas of work.

#### Every Woman, Every Child

<http://www.everywomaneverychild.org/>

<http://www.un.org/webcast>

The UN Department of Public Information (DPI) has launched a periodic discussion forum on current topical issues. Called "Hot issues: Open debates," this forum will bring together representatives of a Member State and senior UN officials face-to-face to discuss current issues of mutual interest. The primary objective of the forum is for participants and viewers to gain a fuller understanding of critical issues from multiple perspectives, including the role of the UN and that of the Secretary-General.

The first of these debates took place on Tuesday, 26 October 2010. Topic was "Sudan: A vision for the future": <http://www.unmultimedia.org/tv/webcast/2010/10/discussion-forum-sudan-a-vision-for-the-future.html>

### **Asia Pacific Disaster Report 2010 (UNESCAP)**

<http://www.unescap.org/idd/pubs/Asia-Pacific-Disaster-Report-2010.pdf>

The UN Economic Commission for Asia and the Pacific (UNESCAP) has issued a report titled Asia Pacific Disaster Report 2010 - Protecting Development Gains. A number of production systems are already being used by farmers and food producers to reduce greenhouse gas emissions, adapt to climate change, and reduce vulnerability. This website provides examples of many of these production systems considered as "climate-smart" and will be constantly updated to highlight additional examples and lessons learned from around the world.

Life expectancy climbed from 59 years in 1970 to 70 in 2010, school enrolment rose from just 55 percent of all primary and secondary school-age children to 70 percent, and per capita GDP doubled to more than US\$10,000.

### **Towards Sustainable Production and Use of Resources: Assessing Biofuels**

*Full report in English, Summary available in English, French, Spanish:*

<http://www.unep.fr/scp/rpanel/biofuels.htm>

The development of renewable energy from materials derived from biological sources (bioenergy) may reduce dependence on fossil fuels and help cut green gas emissions. The processes used for bioenergy production, however, consume considerable amounts of water. The report makes the case for the adoption of new planning approaches to balance the potential of biofuels production to combat climate change with environmental and social impacts.
