

Development

Many people associate the United Nations with the issues of peace and security, but most of Organization's resources are devoted to advancing the pledge of its [Charter](#) to "promote higher standards of living, full employment, and conditions of economic and social progress and development". UN development efforts have profoundly affected the lives and well-being of millions of people throughout the world. UN endeavours are guided by the conviction that lasting international peace and security are possible only if the economic and social well-being of people everywhere is assured.
